TITLE OF THE PROJECT:

EternaLink : A TIME CAPSULE CONNECTION SYSTEM

NAME OF PROPONENT/S:

VILLAHERMOSA, CATALINO GABRIEL
MONTEJO, CHRISTY

BRIEF DESCRIPTION OF THE PROJECT:

EternaLink is a creative time capsule system that allows users to write letters and upload pictures to be stored and delivered to the future on a specified date—whether it be days, weeks, months, or even years later. This innovative platform enables users to send messages to their future selves, creating a delightful surprise when they receive their own words and images from the past. EternaLink emphasizes secure, long-term digital preservation, ensuring that each time capsule is safely stored in a database until the designated delivery date. With EternaLink, users can bridge time and preserve their personal memories, reflections, and insights for the future.

FEATURES OF THE PROJECT:
- Registration
- Login
- User Profile
- Create Letter to the future (compose letters, could be sent to a different email other than the user)
- Create Time Capsule (compose multiple letters at once and specified to be sent 10 years to user's email from the creation date of the letter as it is a TIME CAPSULE)
- Manage letters (view and delete added letters)
- Notifications (confirmation emails, delivery notifications)
